

Statistics Project—Getting Digits

Background: Courtship frequently starts with the male asking the female for her phone number. Whether or not the female surrenders her phone number is determined by many factors. This project attempts to assess those factors.

Test Plan:

Getting Started:

First Meeting:

Formal Procedures Statement: Write down the procedures for your study and have your instructor critique these procedures. Your procedures statement should include: population, sampling technique, basic test instructions, data recording forms, etc.

Collect Data and Compute Statistics: Organize your data into tables and graphs. Compute the relevant statistical test on this data. Specify your conclusions.

Penultimate Meeting: Present your results. If there are problems with the testing procedures resolve them and run the tests again. Discuss what conclusions are justified. Discuss every section of the project report and what your report should have for each section.

Write Project Report Draft: Write your report based on the discussions with your instructor.

Final Meeting: Present your draft report to the instructor. Use your instructor's critique to write the final report.

Write the Project Report.
